

Step-13:

If you want to Move, Copy, Alter, Delete, Drop a database from phpMyAdmin the Go to → operations we may see the operations like as below.

OPERATIONS:

HOW TO ALTER, MOVE, COPY

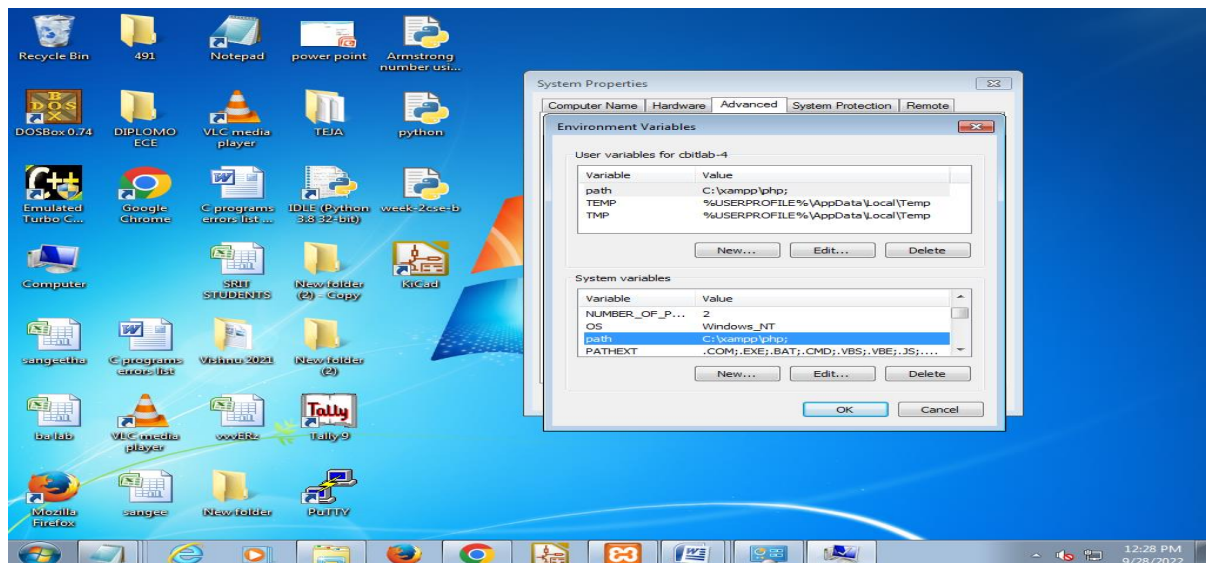

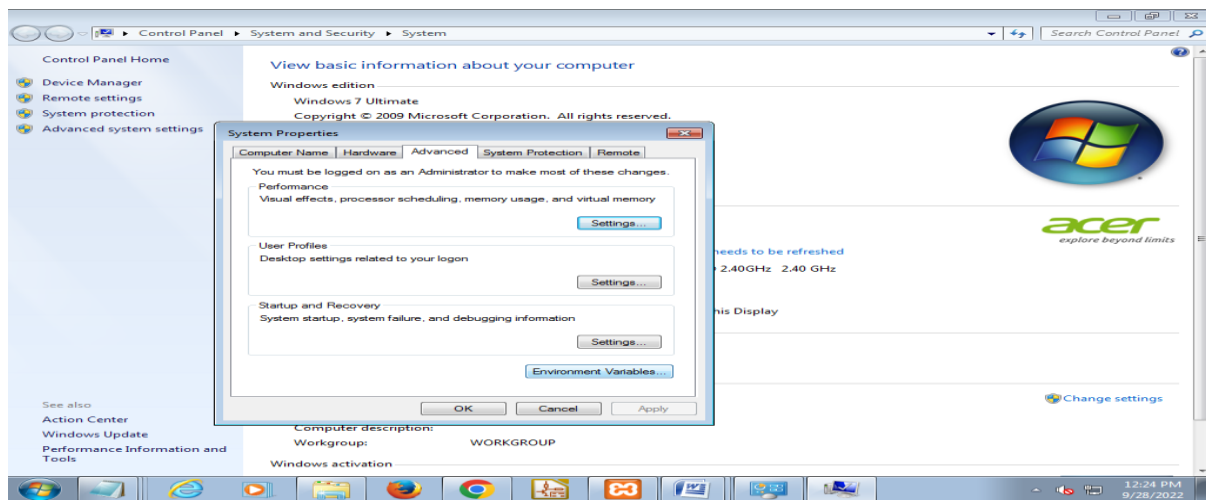

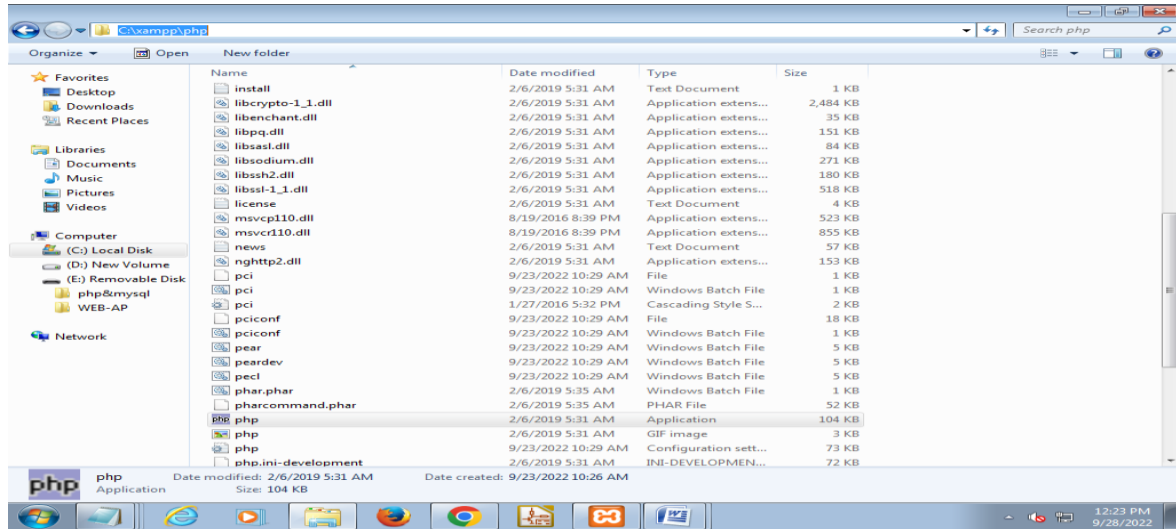

3. Develop a PHP application and run it with a command-line interpreter

Step:1 Path Setting:

open **Computer-> Properties-> Advanced System Settings-> Environment Variables->System variables -> New-> variable name: path , variable value: C:\xampp\php\php**

-

Step:2 Program:

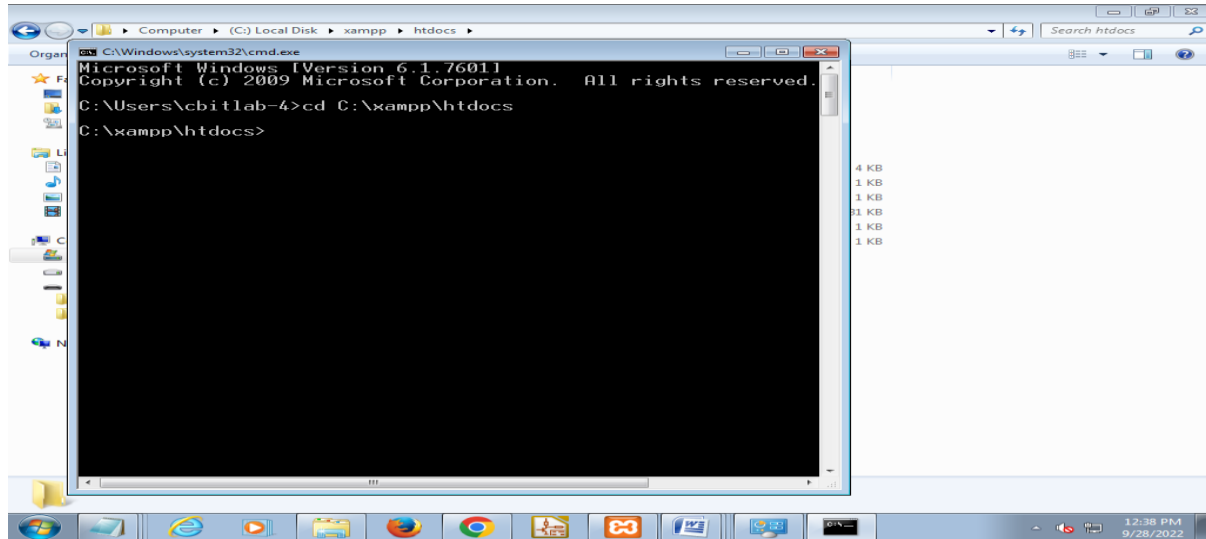

open **Notepad**-> save the program with **.php** extinction.

Ex: fact.php

```
<?php
$count = 0;
$num = 2;
while ($count <30 )
{
    $div_count=0;
    for ( $i=1; $i<=$num; $i++)
    {
        if (($num%$i)==0)
        {
            $div_count++;
        }
    }
    if ($div_count<3)
    {
        echo $num." , ";
        $count=$count+1;
    }
    $num=$num+1;
}
?>
```

Step:3 Run Program:

open CMD and complete the path settings

Step:4

Compile/Run for output
